

Goal of the Meeting

- Wrap up the sub-WGs activity; and
- Complete the Solar-C mission proposal document ready for the next JAXA AO;
- Pick up all the items, backgrounds, and conditions to choose (prioritize) the Solar-C mission concept(s).

weak (uncertain) points > concerns

Plan A

discovery space: dynamo science?

polar magnetic fields & activity – done by ecliptic obs.

technical feasibility; $\mu 20 >$ jupiter

vs solo

Plan B

discovery space: chromospheric spectro-polarimetry

scientific synergy between coronal – chromospheric ?

technical ; too luxurious

vs hinode, sdo, iris, etc.
